# How to Unlock iPhone without Passcode

Forget iPhone passcode can be frustrating, especially when you need access to an old iPhone or the screen has been locked because of entering the wrong password consecutively. Below, I will share different solutions about how to unlock iPhone without passcode, including using iTunes, iCloud, Recovery Mode, and third-party tools, depending on your situation.

Method 1: Unlock iPhone with TunesKit iPhone Unlocker

Most time, a third-party tool is the most efficient way. You can try trusted iPhone passcode unlock tools. After testing and comparing, I recommend an affordable and versatile tool that [TunesKit iPhone Unlocker](.).
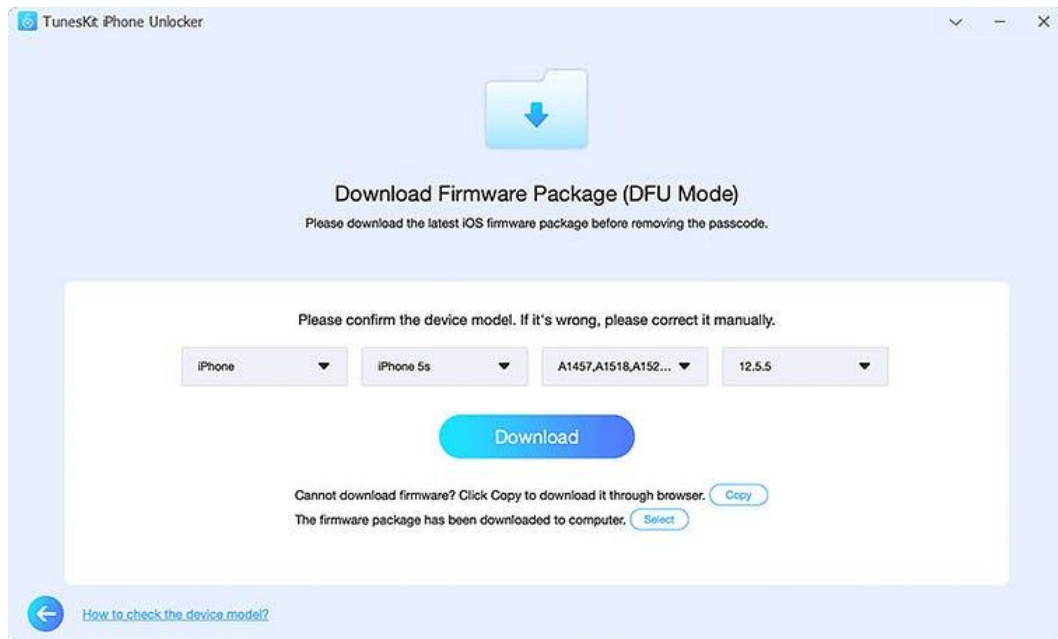

1. Make sure the phone is connected to the computer with a USB cable, and click "**Unlock iOS Screen**".

2. Click "**Start**", according to the operation prompts to enter the recovery mode or DFU mode, after the completion of the return to click "**Start**" again
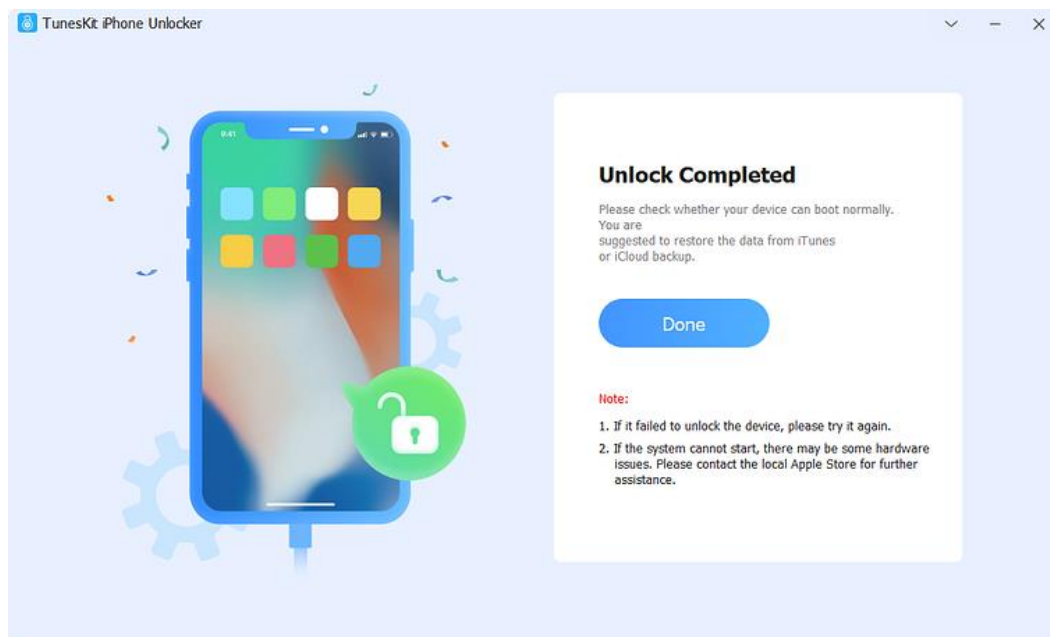

3. Click "**Download**", and wait for completing download the firmware package.

4. After downloading is complete, click "**Unlock**", start to remove the locked screen on iPhone.
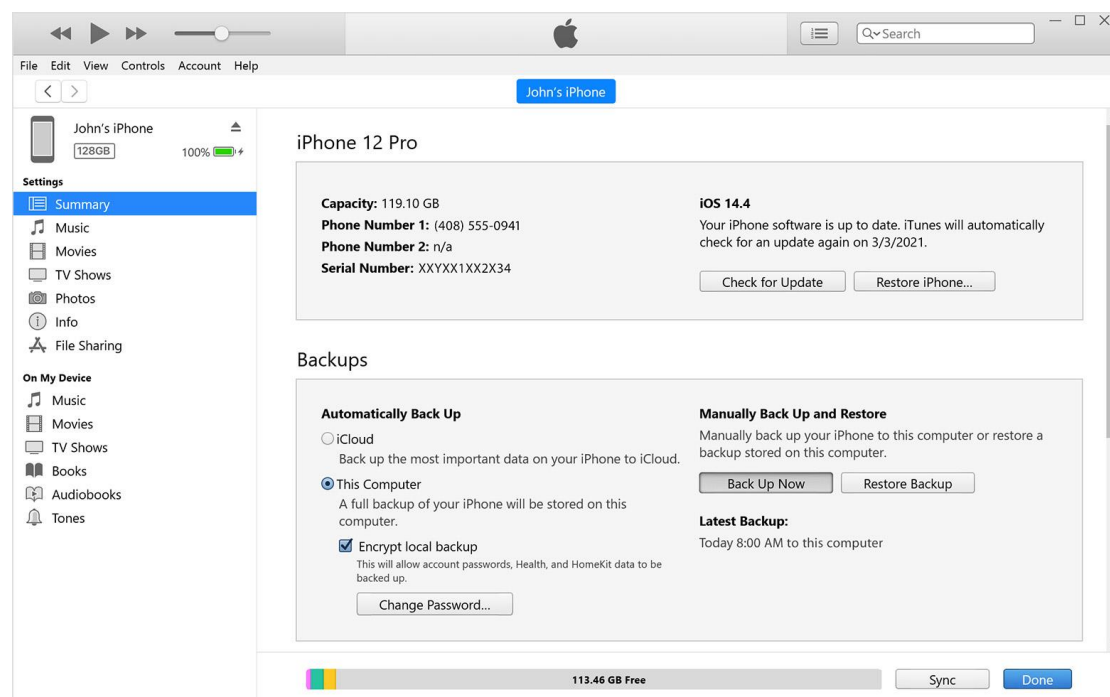

5. Wait a moment and your device will be successfully unlocked.

This helpful tool can not only unlock the iPhone screen but also the Apple ID, MDM Lock, iCloud Activation Lock, Screen Time Passcode, and iTunes Backup Encryption.
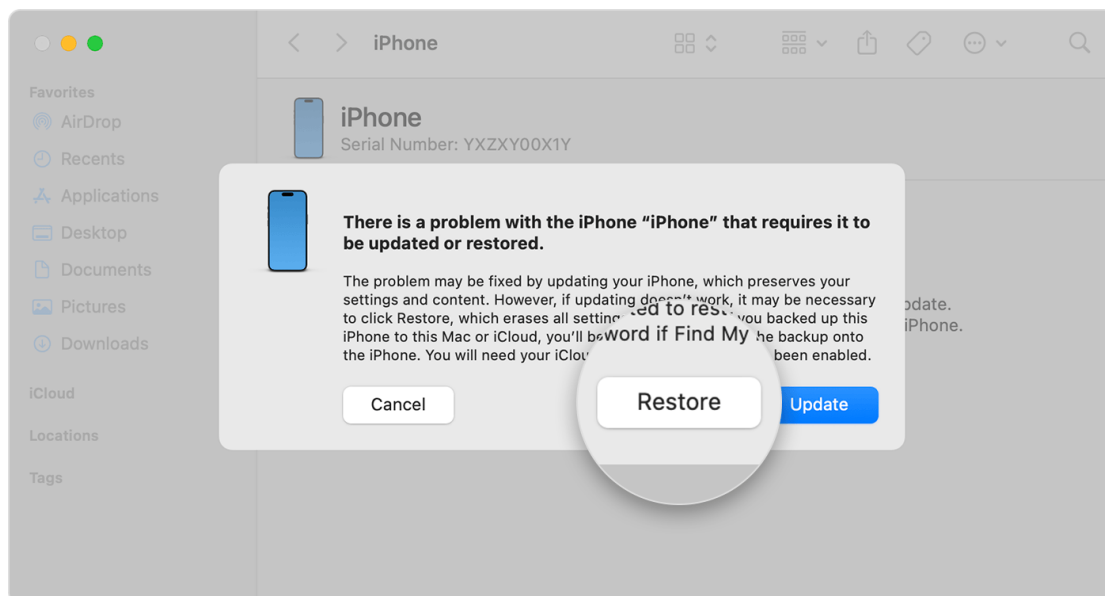

Method 2: Unlock iPhone Using iTunes/Finder

If you've previously backed up your iPhone with iTunes on a trusted computer, you can restore your device to remove the passcode.

1. Connect your iPhone to the computer with a USB cable.

2. Open iTunes on Windows (or Finder on macOS).

3. Wait for iTunes/Finder to recognize your iPhone. If prompted for a passcode, try another computer or use Recovery Mode (see Method 3).

4. Click "**Restore iPhone**" to erase all data, including the passcode.

5. Set up your iPhone as new or restore from a backup.

Method 3: Use Recovery Mode

If you've never backed up with iTunes or don't have Find My iPhone enabled, Recovery Mode is your best option.

1. Connect your iPhone to a computer and open iTunes/Finder.

2. Force restart your iPhone:

iPhone 8 & later: Press and release Volume Up button, then Volume Down button, then hold the Side button until Recovery Mode appears.

iPhone 7/7 Plus: Hold Volume Down and Side button until Recovery Mode appears.

iPhone 6s & earlier: Hold Home and Power buttons until Recovery Mode appears.

3. In iTunes/Finder, click "**Restore**" to erase the iPhone.

4. Set up your iPhone as new or restore from a backup.

Method 4: Unlock iPhone passcode without computer

If "Find My iPhone" is enabled, you can remotely erase your device using iCloud and don't need a computer.

1. Go to the iCloud website.

2. Log in with your Apple ID (the same one used on your locked iPhone).

3. Click "**Find My**" and select your locked device.

4. Choose "**Erase This Device**" to wipe all data, including the passcode.

5. Set up your iPhone again after the reset

Note: This requires an internet connection on your locked iPhone.

Final Tips:

1. Backup regularly to avoid data loss.

2. Use Face ID or Touch ID for easier access.

3. Contact Apple Support if you're locked out permanently.

By these methods, you can learn how to unlock iPhone without passcode. Please always ensure you have a backup to prevent losing important data.
